

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

AT&T Connected Learning
AT&T Connected Learning Centers in local nonprofits provide free resources for students and families, including high-speed internet,

In 1885, the American Telephone and Telegraph Co. was incorporated by American Bell. This is where we first see the “AT&T” name come into play. The subsidiary was used to build out the telephone network that first began in New York.

- Interest-Powered. Interests foster the drive to gain knowledge and expertise. ...
- Production-Centered. ...
- Peer-Supported. ...
- Shared Purpose. ...
- Academically-Oriented. ...
- Openly-Networked.

AT&T Corporation, formerly (1899–1994) American Telephone and Telegraph Company, major American brand and corporation that **provides long-distance telephone and other telecommunications services.**

AT&T is a leading provider of telecommunications and media services. The company derives a bulk of its revenues from its Communications business, which includes its wireless phone business, broadband, and pay TV operations

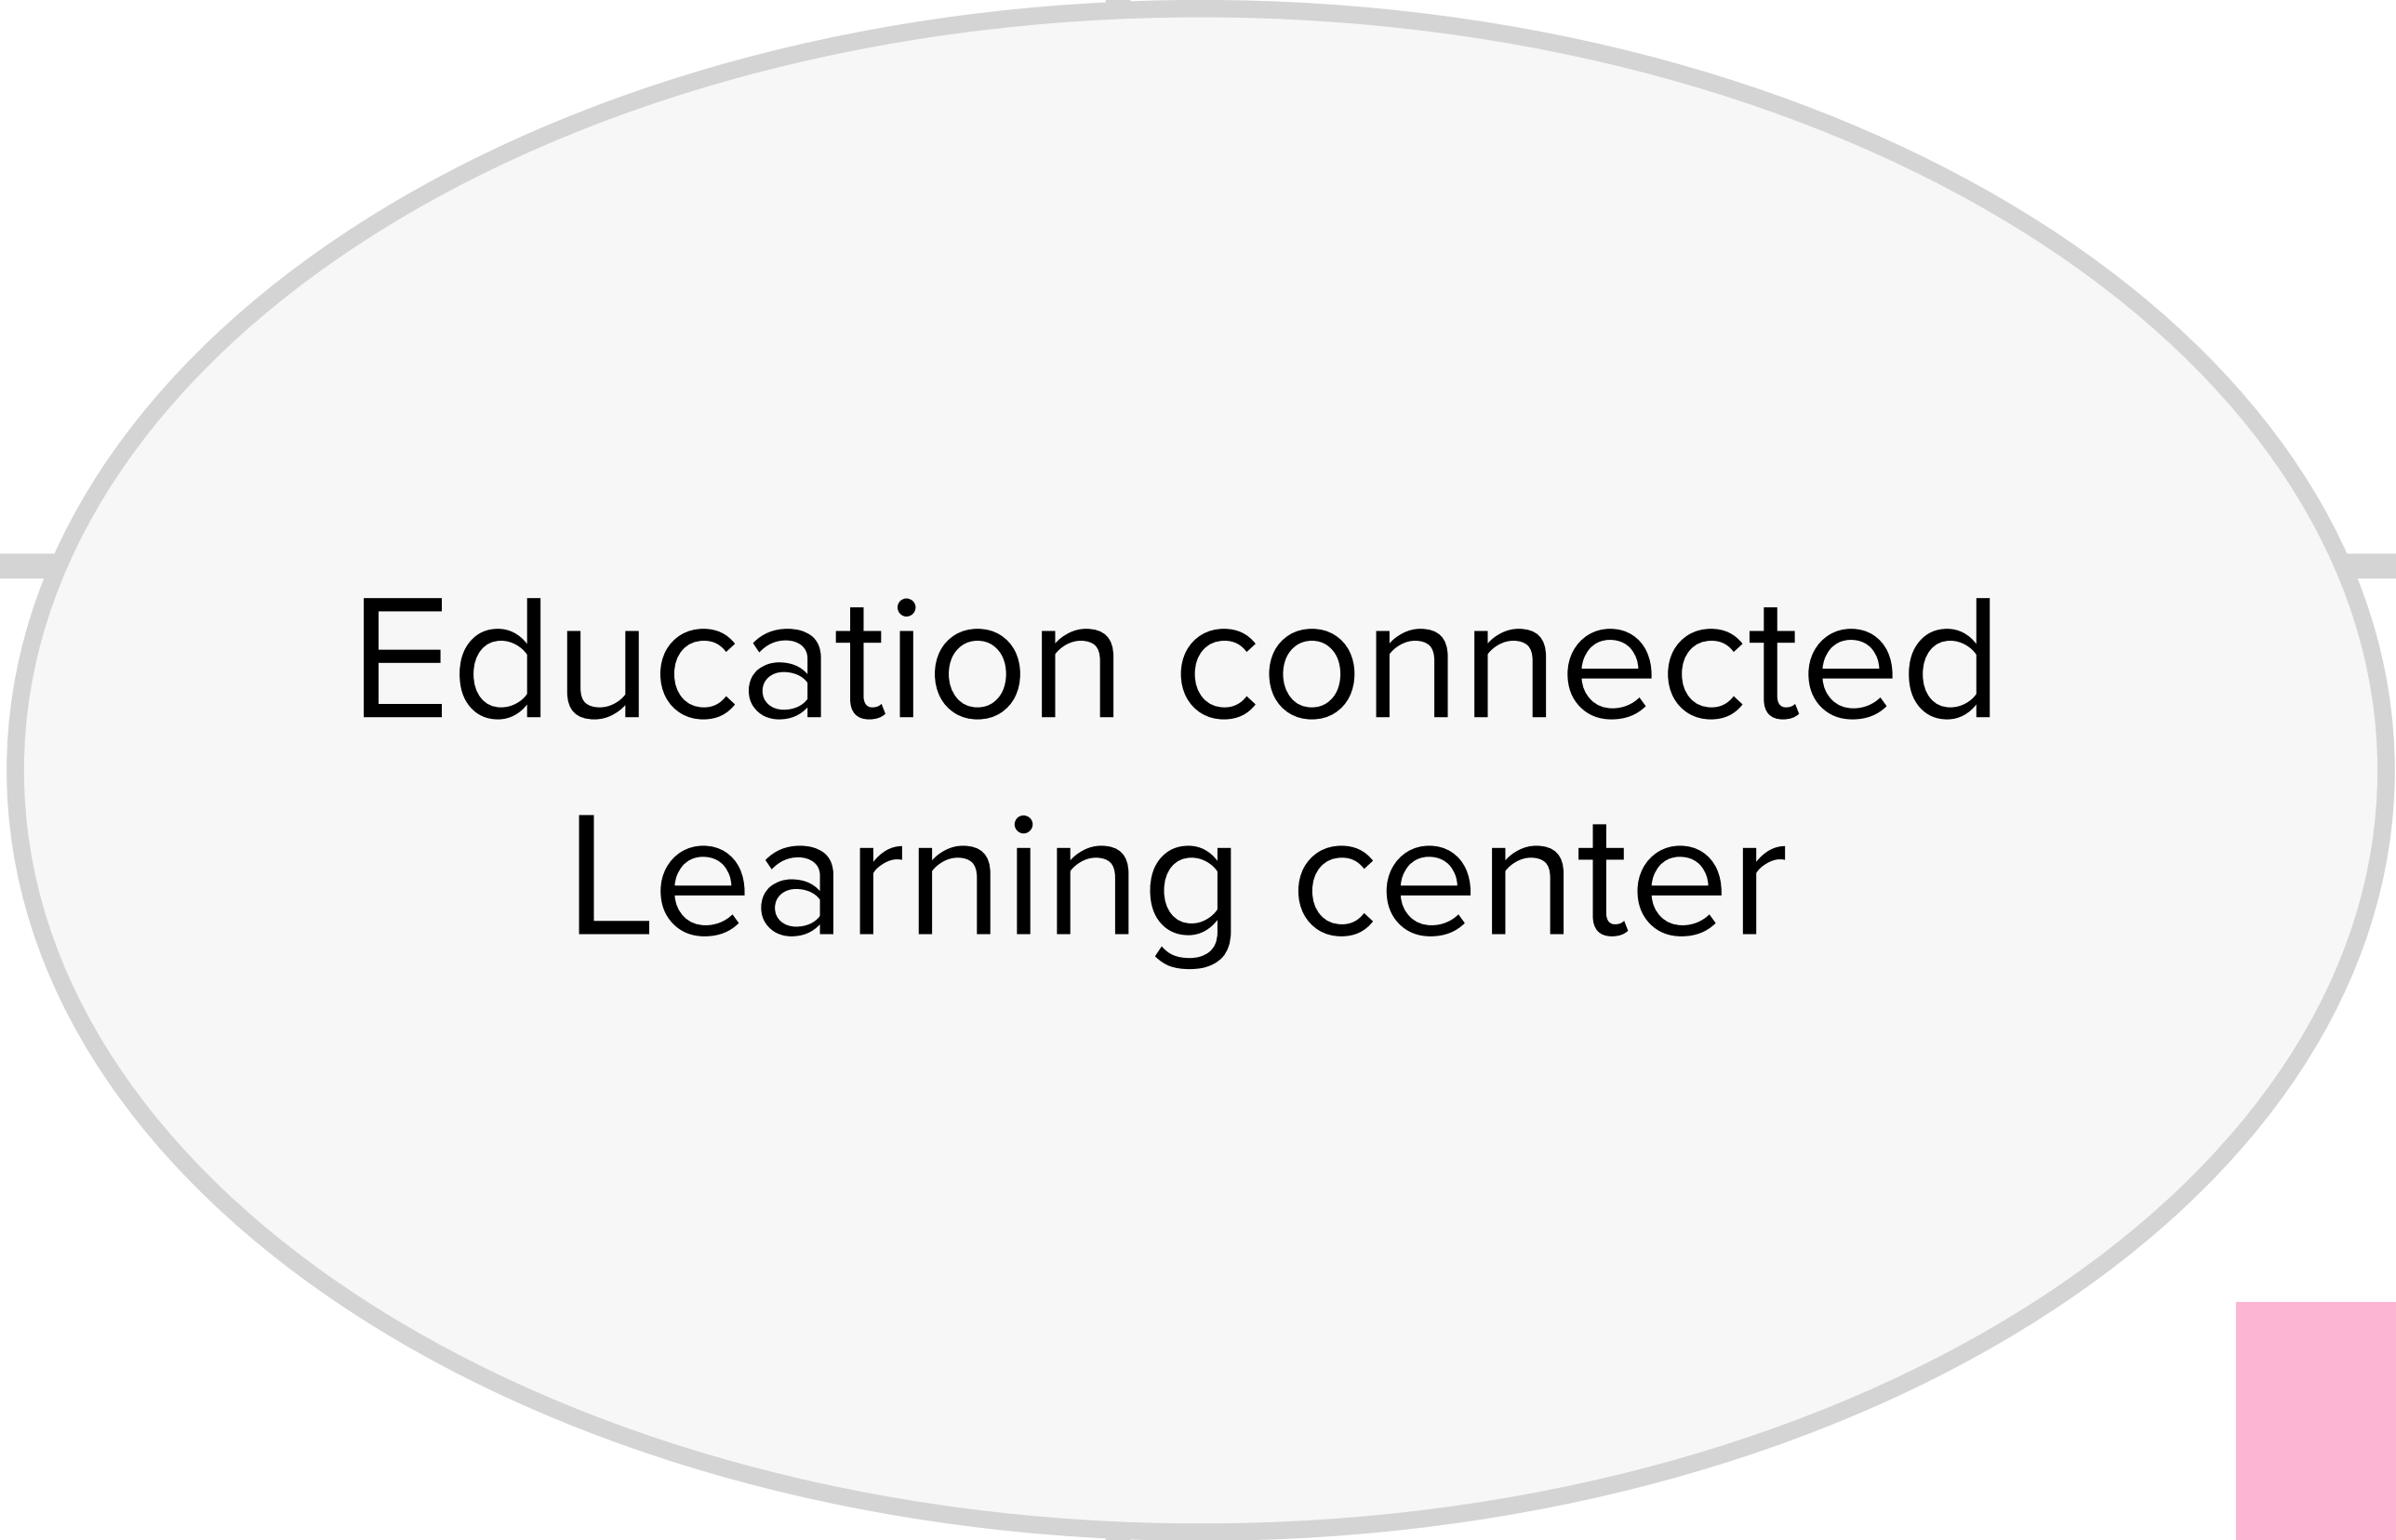

Connected learning builds on student interests, develops their relationships, and increases life opportunities

Connected learning integrates personal interests, supportive relationships, and access to opportunities. It is learning in an age of abundant access to information and social connections that grows from the diverse interests and assets of young people.

Areas in a classroom that are designed to provide a variety of learning materials or tools through which students can work by themselves or with others to practice skills learned in class

Learning centers are student focused. Since all ESL classrooms are multi-level in some way, using learning centers allows slower students to spend more time practicing lessons from class while more advanced students deepen their understanding and ability to use the target skills or language.

Centers are an important part of a classroom environment because: They allow students time to engage in developmentally appropriate practice activities that are well thought-out and planned by the teacher.

Attends workshops and classes.

Collaborates with other learners.

Uses online resources

An empathy map is not about a specific individual, but rather, it represents a typical student who is completing your unit.

Empathy maps have 5 components: a representation of a user group (e.g., persona picture and name) and 4 quadrants for what that user says, thinks, does, and feels.

Excited

Nervous

Overwhelmed

anxious

curious

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
